## Environmental policy

The purpose of this policy

Ridercam AB (publ) ("Ridercam" or the "Company") is a public company whose shares are intended to be traded on a Swedish trading venue ("trading place"). The Company shall comply with the rules in force on the market place, and other applicable laws and regulations applicable to public limited companies in Sweden. This environmental Policy is the first step to work toward meet a general target of the company's operations should leave such a small "footprint" as possible.

Ridercams goal is to work for the long term, reduce the negative environmental effects of the business, taking into account the practical and financial conditions, the different world markets the company operates in, as well as the requirements of customers and clients have on our activity.

We intend to achieve these objectives and thereby contribute to ecologically sustainable development by:

- strive for more efficient operations through efficient scheduling of tasks and through greater awareness among all participants in the project and processes
- that environmental issues are included in the technology solutions we propose to our customers
- choose eco-efficient and safe traffic transport
- to primarily use suppliers who are actively working with environmental issues
- strive to the products we use in manufacture and installation are so low negative impact on the environment as possible, and that they can be recycled
- actively implement and awareness Ridercams environmental policy of our suppliers and other partners
- actively monitor changes in legislation regarding environmental issues and constantly work towards a more sustainable development
